

Invitation to the Great Debate
“Epidemics, Urban Systems and Geosciences”
12:30-14:00 CET Monday 4 May, 2020
e-room COVID-19
<https://vmi270945.contaboserver.net/b/pau-guy-rwr>

The Covid-19 pandemic is upsetting the geosciences agenda, particularly that dealing with urban systems so that they contribute more to well-being and health. This great debate will be an opportunity to take stock and open up perspectives, particularly on epidemics and mobility, the dynamics of Covid-19, cities, health and geosciences.

Do not miss the opportunity to e-debate with:

Theo Geisel
(Max Planck Institute, Göttingen)

Jacques Demongeot
(Université Grenoble Alpes)

Mark J. Nieuwenhuijsen
(Institute for Global Health,
Barcelona)

This Great Debate is a follow-up of the European Geosciences Union (EGU) session “Urban Geoscience Complexity: Transdisciplinarity for the Urban Transition” and is organised with the UNESCO UniTwin CS-DC (Complex Systems Digital Campus)

e-Convener: **Daniel Schertzer** (Ecole des Ponts ParisTech)

e-Co-conveners:

Alexander Baklanov (World Meteorological Organisation)

Paul Bourguin (UNESCO UniTwin)

Matthias Demuzere (Ruhr-University Bochum),

Klaus Fraedrich (Max Planck Institute, Hamburg)

Gaby Langendijk (Climate Service Center Germany)

Gabriele Manoli (University College London),

Stefano Tinti (Bologna University)

Benjamin Zaitchik (Johns Hopkins University)

To participate, just click on the link :
